

P2: Personatges (intro templates)

```
1 from django.urls import path
2 from . import views
3
4 urlpatterns = [
5     path("<str:pk>", views.personatge, name="personatge"),
6     path("/", views.home, name="home")
7 ]
```

Figure 1: urls.py

```
1 from django.shortcuts import render
2
3 # Create your views here.
4 def home(request):
5     return render(request, "personatges/home.html", {"error": False})
6
7 def personatge(request, pk = ""):
8     valid = ['jace', 'chandra', 'liliana', 'tezzeret', 'ajani']
9     frases = ["It's good to learn from your failures, but I prefer to learn from the failures of others.",
10              "Who'd want to ignite things one at a time?",
11              "Life is a game, and I play to win.",
12              "The secrets I have gathered will make me the most powerful being in the Multiverse.",
13              "Stand together. You are stronger than you know."]
14
15     if pk not in valid:
16         if pk == "home":
17             return render(request, "personatges/home.html")
18         return render(request, "personatges/error.html")
19
20     context = {"personatge": pk,
21               "frase" : frases[valid.index(pk)]}
22
23     return render(request, "personatges/personatge.html", context)
```
